Today's Just-In-Time manufacturing environment, along with increasing customer demands, requires faster setup times than ever before. In meeting these demands, you are also required to conserve capital and carefully manage your company's resources. Enter retrofitting - a cost-effective way to meet customer demands, create faster setup times, and endure JIT manufacturing environments. Retrofitting for Quick Die Change in America by Gary Zunker is a step-by-step approach to successfully retrofit your existing equipment to reduce setup time. Published by Fabricators & Manufacturers Association, International (FMA), this book addresses the subject of reducing job change on stamping presses by using your existing equipment with improved hardware, equipment, and methods.

This 114-page book will teach you how to:

- o Cost justify retrofitting for quick die change
- o Use both hourly and salaried employees to get the job done
- o Identify the hardware, equipment, and methods needed to implement a retrofitting program
- o Prepare and care for dies after retrofitting for quick die change
- o Select die-handling equipment
- o and much more!

Chapter headings include: What is Minimum JobChange?; How to Get Started; Justifying Quick Die Change; Setup Reduction; Selecting Your Die Handling System; Case Studies; Readyng the Die Before and After Die Change. Revise Your Competitive Status! Retrofitting for Quick Die Change in America has case studies that demonstrate practical examples of companies that have successfully implemented quick die change programs in their pressworking operations. This book explains how to retrofit your company to maximize the use of your existing equipment, lower your labor and operating costs, and improve your competitiveness in the marketplace.
